

MULTIPLUS FEEDER

Whether it's chopped silage, square bales, rota-cut round bales or fodder beet, you can rest assured that the MultiPlus Feeder will get the job done with minimal waste.

KEY FEATURES

- Can feed out both sides & into troughs
- Rate control on the cross floor chain with elevator load sensing valve
- Combined Hardox450® and Strenx700® tub body for unmatched structural strength and toughness
- High sides are standard for stacking two layers of square bales
- LED lights
- Rope rail runs the full length of the body to tie bale twine on to. The twine strips off the bale as the load moves forward
- Hydraulic tilting elevator on right hand side with concertina anti-spillage plates
- Chain and slat transfer floor allows the load to be reversed
- Heavy duty tandem axles with remote greasing points

The rear gate opens fully to allow for loading bales through the back of the machine.

Concertina side plates reduce spillage of feed from the sides of the folding elevator.

The feed elevator is standard with hydraulic adjustment to reach over fences and into feed troughs.
